

Pollination data confidence score

- 6 Pollination system, wind pollination explicitly tested for, pollination rewards clear, pollination efficiency of different pollinators tested
- 5 Pollination system but wind pollination not explicitly tested for, pollination rewards clear, pollination efficiency of different pollinators not explicitly tested but pollinators observed transporting pollen and effecting pollination
- 4 Pollination system based on general observations of pollinator visitation and informed by syndrome
- 3 Pollination syndrome but specific adaptations for insect, vertebrate, wind or water pollination clearly described
 - 2 Pollination syndrome based on interpretations of images or illustrations and text, and pollination in similar closely related species
 - 1 Pollination syndrome based on interpretations of images or illustrations and text but least confident
